

Connect to Azure

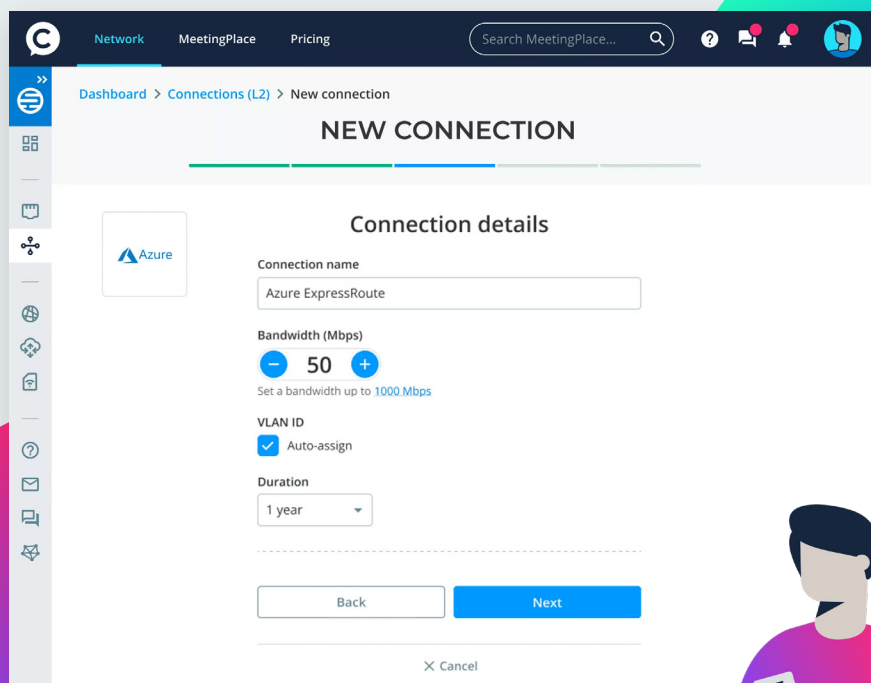

Enhance the **speed, reliability** and **performance** of your connections to Azure with Console Connect.

We make connecting directly to Azure easy

Using the Console Connect Network-as-a-Service platform, it couldn't be simpler for your business to directly connect to Microsoft products and services.

As a trusted Azure ExpressRoute partner, Console Connect offers extensive reach to Microsoft locations worldwide using our own high-performance global network.

Through a single management portal, you can build and scale your connectivity to Microsoft and all other major cloud platforms – in real-time and on-demand.

The screenshot shows the 'NEW CONNECTION' form in the Console Connect interface. The form is titled 'NEW CONNECTION' and is part of the 'Connections (L2)' section. It features a sidebar with navigation icons and a top navigation bar with 'Network', 'MeetingPlace', and 'Pricing' tabs. The form itself is titled 'Connection details' and includes the following fields:

- Connection name:** A text input field containing 'Azure ExpressRoute'.
- Bandwidth (Mbps):** A numeric input field with a value of '50'. Below it, a note says 'Set a bandwidth up to 1000 Mbps'.
- VLAN ID:** A checkbox labeled 'Auto-assign' which is checked.
- Duration:** A dropdown menu set to '1 year'.

At the bottom of the form, there are 'Back' and 'Next' buttons, and a 'Cancel' button at the very bottom.

The faster, smarter way to **manage your connectivity** —

Easy setup

Console Connect does the heavy lifting with connecting your on-premises network to Azure.

Improved performance

Avoid the public internet and experience a more consistent and secure connection to Azure.

Simple to manage

See real-time pricing for connectivity to Azure and self-provision and manage your interconnection through our platform or via our API.

Scalability

Access multiple Azure regions or connect seamlessly between different cloud providers.

Reduce network costs

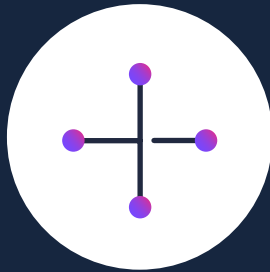

Save money on egress charges and adjust bandwidth to meet the needs of your workload.

From device to cloud

Connect your devices directly to Azure to support remote working or IoT applications.

Choose your connectivity model —

Point-to-point Layer 2

Click and connect between your Access Port and Azure location of choice.

[Find out more](#)

Layer 3 CloudRouter®

Use CloudRouter® to dynamically route traffic between devices, office locations, applications and clouds.
