

# Console Connect Layer 1

Console Connect has recently introduced the first phase of its Layer 1 service, giving you access to one of the world's highest performing global transmission networks via our easy-to-use self-service portal.

Manage and order your Layer 1 service online, and be part of our journey towards a fully automated and on-demand solution.

## Be part of the Layer 1 automation revolution

Transmission networks play an essential role in the global digital ecosystem. But today's Layer 1 services remain undynamic and inefficient.

Over provisioning capacity and underutilising network resources is a common problem. So too is

ensuring that network redundancy and resiliency is in place when disaster strikes.

Console Connect is on a mission to change the perception of Layer 1 networks by combining cloud-like agility with a carrier-grade network to give power and control back to businesses.

We are building a solution that will give your business greater flexibility and ease when it comes to managing large volumes of bandwidth – enabling you to scale bandwidth to meet higher demand, and remove unneeded bandwidth during low periods. All on a pay-as-you-go basis.

By getting setup with a Layer 1 port today and becoming an early adopter of the service, you can experience the benefits of self-service and provide valuable feedback to help improve our service.

# Why choose **Console Connect Layer 1**

## Instant pricing

Easily check the price of bandwidth for routes between key data centre locations.

## Online order and management

Order up to 100Gbps bandwidth between data centres worldwide.

## Diverse routing

Choose from 40+ subsea cable routes with the option to select a primary and redundant route.

## Multiple services, one platform

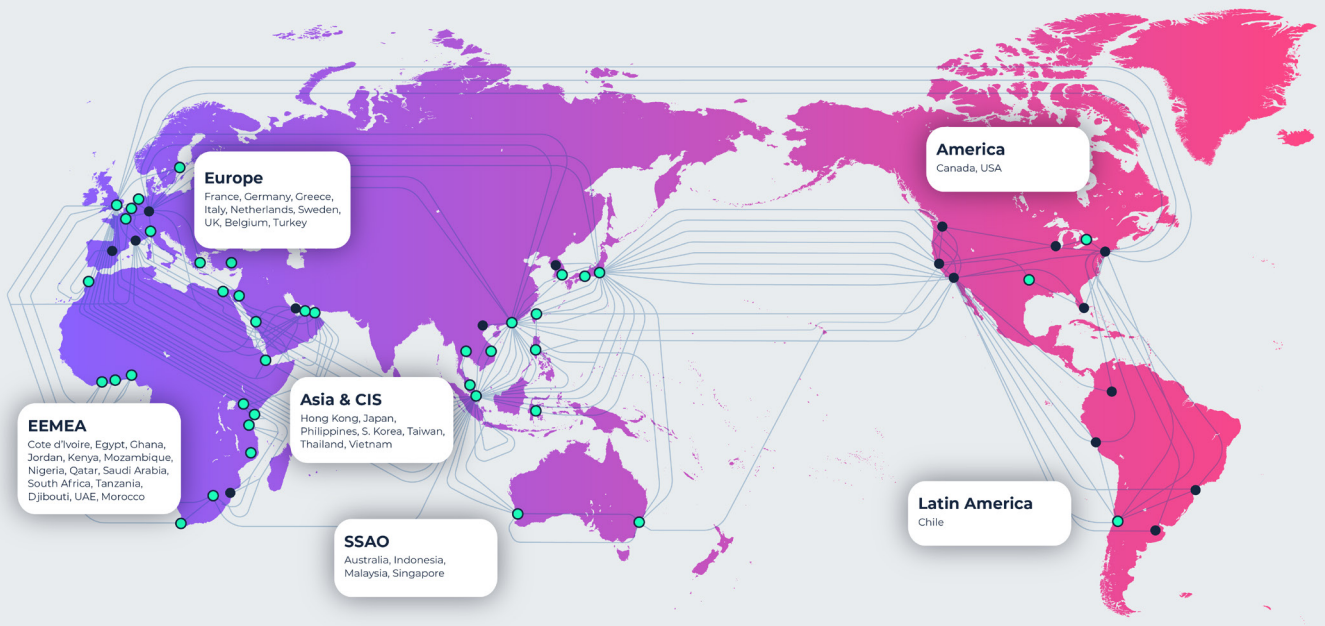

Manage your Layer 1, Layer 2, Layer 3 and IP Transit services through a single management portal.

# Access to a best-in-class global network

At the heart of our Layer 1 service is a carrier-grade network, with access to a wide range of subsea and terrestrial cable routes.

Our network is scalable, reliable and backed by some of the most stringent SLAs in the business.

## Layer 1 network features

-  Fully resilient global network with access to more than 40 subsea cable systems.
-  Guaranteed bandwidth backed by stringent SLAs.
-  Diverse choice of PoPs in key cities and countries
-  Suitable for latency-sensitive applications.
-  Leverages latest networking technologies, such as OTN and MPLS-TP.

## For carriers and service providers

Expand your network reach to more cable systems and data centres globally.

Quicker pricing and ordering of service via the Console Connect management portal.

## For enterprises

Interconnect between 80+ data centres in 30+ countries with dedicated bandwidth.

Support time-sensitive applications via a protocol transparency connection with minimal transmission delay.

## How to get started

Register as a company on Console Connect.

Order a port and Layer 1 service to any of our 80+ enabled data centres.

Select our protected service to ensure route resiliency and diversity.

Choose your length of contract (minimum of 1 month).

Manage your Layer 1 service via the Console Connect platform (service provisioning times can vary and can take up to 10 working days).
